

ENVIRONMENTAL POLICY

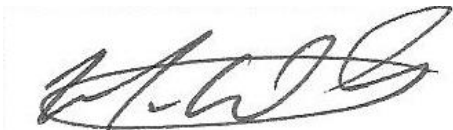

LightSource is engaged in Australia wide civil engineering and project management including design, construction and infrastructure maintenance services.

LightSource is committed to delivering profitable projects and services in a safe and environmentally responsible manner.

PRIMARY ENVIRONMENTAL OBJECTIVES

To support this commitment, LightSource will:

- Comply with relevant environmental laws, regulations, industry codes of practice and project requirements specified by clients or regulators.
- Establish, measure, report and review environmental objectives, key performance indicators and targets.
- Maintain an environmental management system that conforms to recognised standards including ISO 14001, integrated within the LightSource Operations System.
- Control the impact of our operations on the environment and community through effective planning and risk management methodologies.
- Communicate pertinent environment responsibilities and obligations to employees, consultants and subcontractors and provide appropriate education.
- Establish and maintain a program for the continual improvement of the environmental management system and environmental performance.
- Seek to minimise pollution and use of natural resources by encouraging and practising economically viable waste reduction, emission control, energy conservation and recycling programs.
- Review this policy statement periodically and make it available to clients, regulators and other interested parties upon request.
